Exam : **CWT-101**

Title : CWNP Certified Wireless
Technician (CWT)

Vendor : CWNP

Version : DEMO

NO.1 What kind of AP mounting kit is most likely to use U-brackets?

- A. Desktop mount
- B. Ceiling mount
- C. Pole/mast mount
- D. Wall mount

Answer: C

NO.2 When configuring an AP or controller, what is the collection of settings that define radio operations and the parameters for the BSS?

- A. WLAN profile
- B. LAN configuration
- C. Admin account credentials
- D. WAN configuration

Answer: A

NO.3 You have configured a WLAN profile on a client computer for a hidden SSID network. The SSID operates in both 2.4 GHz and 5 GHz. The profile never connects or even attempts to connect. What is the most likely configuration error in the profile or on the computer?

- A. Wrong passphrase
- B. Band selection is configured for 5 GHz-only
- C. Wrong SSID
- D. Band selection is configured for 2.4 GHz-only

Answer: C

NO.4 What does dual-band refer to in the context of an 802.11 AP?

- A. Support for two simultaneous wireless connections
- B. Support for two different frequency bands
- C. Ability to operate in two operational modes
- D. Multiple-SSID support for guest access

Answer: B

NO.5 What is the term used to describe the process of configuring a wireless device to join a specific wireless network?

- A. Provisioning
- B. Network join
- C. Security
- D. Channel widths

Answer: B

NO.6 What best describes passive scanning used to locate WLANs?

- A. Listening for beacon frames from the APs
- B. Scanning in only on frequency band
- C. Sending probe requests and listening for probe responses

D. Scanning on only one channel

Answer: A

NO.7 What metric is most commonly used at the receiver to report the signal strength?

A. dBm

B. Watt

C. Milliwatt

D. Nanowatt

Answer: A

NO.8 You are considering the use of an EAP method. All potential clients have been validated to support the EAP method.

What other network device/location must support the EAP method for it to work?

A. RADIUS Server

B. Ethernet Switch

C. Controller

D. AP

Answer: D

NO.9 What is the term used to describe the software component responsible for authenticating and connecting to a wireless network?

A. Configuration errors

B. Interference

C. Supplicant

D. Feature incompatibility

Answer: C

NO.10 Which parameter represents the power of an RF signal?

A. Gain and loss

B. Output power

C. Amplitude

D. dBm

Answer: D

NO.11 What kind of authentication is used by WPA2-Enterprise implementations?

A. WEP

B. Preshared key

C. Passphrase

D. 802.1X/EAP

Answer: D

NO.12 Which security problem can occur if the network key used for authentication during the join process in a wireless network is incorrect?

- A. Configuration errors
- B. Incorrect passphrases
- C. Incompatible EAP methods
- D. Incorrect join keys

Answer: D

NO.13 What is the term used to describe the decrease in signal strength as an RF signal propagates through space?

- A. Gain and loss
- B. Reflection
- C. Refraction
- D. Free space path loss

Answer: D

NO.14 Which factor determines the available channels for RF communication?

- A. Regulatory constraints on channel selection
- B. Best practices for channel selection
- C. Antenna types
- D. Protocol used

Answer: D
